BIOGRAPHY

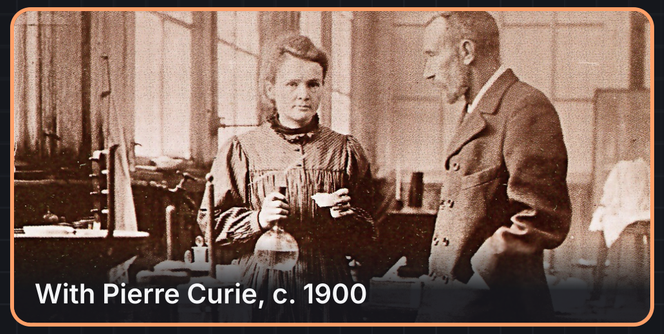

Marie Curie: Two Prizes, Two Sciences

Born in Warsaw, 7 November 1867. Still the only person with Nobel Prizes in two scientific categories.

MARIE CURIE

c. 1898

With Pierre Curie, c. 1900

A LIFE IN FIVE DATES, AND TWO PRIZES

1867 — Born, Warsaw

1898 — Polonium, radium

1903 — Nobel, Physics

1911 — Nobel, Chemistry

1934 — Dies, 4 July

PHYSICS 1903

- Henri Becquerel · 1/2
- Pierre Curie · 1/4
- **Marie Curie · 1/4**

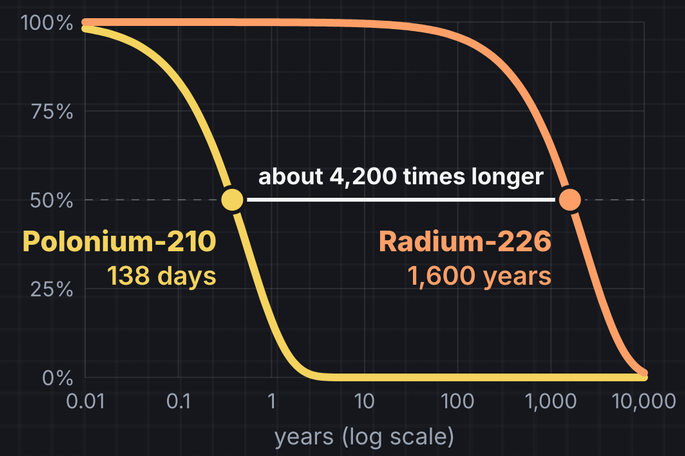

CHEMISTRY 1911

1/1

- **Marie Curie, sole winner**

For discovering polonium and radium, and isolating radium.

HALF-LIFE: 4,200 TIMES APART

AFTER ONE YEAR, HOW MUCH IS LEFT?

1898 — Polonium (July) and radium (December) announced. She named polonium after Poland.

1/4 — Her share of the 1903 Physics prize. The 1911 Chemistry prize was hers alone (1/1).

1,600 — Years: the half-life of radium-226. Polonium-210 halves every 138 days.
